## 1

### Set the Goals

**Define the output you want to create in a a couple of sentences**

The goal is to use Python for analyzing a healthcare dataset to uncover relationships between health metrics and heart disease. Also decode the patterns and trends in health data by applying data exploration and cleaning techniques, followed by data visualization.Finally create a research report on healthcare analytics, Python notebooks with properly commented code, and a final presentation with findings and analysis.

**Add the skills that you want to learn by the end of the menternship**

| | |
|---|---|
| 1. Data Analysis | 2. Data Visualisation |
| 3. Data preparation | 4. Report Writing |

**Add the key learnings you want**

1. Learn how to efficiently analyse huge datasets with techniques

2. Create a visually attractive presentation

3. Create charts that are easily understandable

## 2

### Major Constraints

**Add the constraints you face in completing the menternship**

1. Limited Experience with Large Datasets

2. Balancing college assignments, and the internship can be difficult

3. Not being proficient in using Google Slides or presentation software

4. Further enhancement of Python skills is necessary

**Add the resources**

| | |
|---|---|
| Handling Large Datasets | Mastering Presentation skills |
| Project Planning | All about Google Slides |

## Add the schedule

**Is it a Technical Internship?**
